Team Contract
- Group members will treat each other with respect and dignity
- Group members will effectively communicate their schedule
- Group members will be **kind**
- Code should be efficiently documented in an agreed-upon format
    - *Clean code* should be used as a resource
    - Code should be consistently pushed to git
- Code comments should be detailed and written in the input/output format
- Get your work done on time
- Roles
    - Conor: Coordinator: Work to ensure group collaboration goes smoothly, standardize code, assist the front and back end workers with their tasks. Potentially reach out to people if we desire feedback on our UI. Connect team members with research and resources for design and front-end work.
    - Aidan: Front-end worker and API - Build basic UI and web structure, manage API calls if we decide to. Help out others and debug as needed.
    - Wesley: back-end worker - work on database and filters, Assist other team members if needed.
